

AR13.1 - Automatic rebroadcast station

Type designation: **AR13.1**

PN (RN): **2018.100.62**

The AR13.1 automatic rebroadcast station, in stationary or mobile assemblies, is designed to automatically rebroadcast signals, increasing operating range of RF13 and RF1301 transceiver radio networks in the entire frequency range and in all operating modes, with RF20 and RF2050 transceivers on fixed frequency in 30.000 MHz to 87.975 MHz frequency range. The AR13.1 station includes ZV13.1 (50 W) power amplifier.

Technical parameters

Automatic signal rebroadcasting

Voice operation with 150 Hz pilot frequency, including encrypted voice communication.

Short coded messages (FLASH)

Data in MD13.1 radio modem format

Phone dialing

Repeater activation modes

Permanently active

Activation command

Activation command issued by authorized users (present in the list of end stations stored in the repeater)

Frequency range

30.000 MHz to 87.975 MHz

Input and output impedance

50 Ω

Nominal output of the transmitter

50 W

Minimum frequency separation between receiving and transmitting frequencies	10 %
Direct supply voltage	18 V to 33 V
Current consumption at 27 V supply voltage	max. 9 A
Operating temperatures	-20 °C to +50 °C
Dimensions	W 490 mm x H 430 mm x D 335 mm
Weight	33 kg

Documentation

AR13.1 operating instructions	2018.010.52
RF13 operating instructions	2000.010.02
RF1350 operating instructions	2011.010.02

Set

Type designation	PN (RN)	Name
AR13.1	2018.000.62	Automatic rebroadcast station set

Components
