

FG40 - Fillgun

Type designation: **FG40**

PN (RN): **2420.100.01**

Designed to upload operating data to the RF40 transceiver. The fillgun is designed as a small compact unit equipped with a transceiver connector, a PC connector, stored data erase button and a signaling LED.

Operating features

- easy direct connection to the transceiver via the U-229/U connector,
- connection to a PC via USB,
- safety data erasure without any external power.
