

# GPA24 - Satellite navigation antenna (with installation mount and radome) set

Type designation: **GPA24**

PN (RN): **2042.000.53**

Set consists of GPA24 antenna with installation mount and radome and documentation. For basic operation no other components are required. Flat satellite navigation antenna GPA24 is designed for the reception of GPS signal. The antenna is suitable for vehicles, antenna masts or portable tripods. It contains a low-noise preamplifier which makes it possible to connect the antenna using a long cable. Its high climatic and mechanical resistance ensures operation in the most demanding environments, including military application. For more details see the device page.
