

GPA24 - Satellite navigation antenna (with installation mount and radome)

Type designation: **GPA24**

NSN: **5985160020272**

PN (RN): **2042.100.53**

KČN: **0064681101274**

Flat satellite navigation antenna GPA24 is designed for the reception of GPS signal. The antenna is suitable for vehicles, antenna masts or portable tripods. It contains a low-noise preamplifier which makes it possible to connect the antenna using a long cable. Its high climatic and mechanical resistance ensures operation in the most demanding environments, including military application.

Technické parametry

Technické parametry jsou shodné s údaji platnými pro anténu družicové navigace GPA24A (2042.100.50).
