

GTR51 - Time and frequency transfer GNSS receiver set

Type designation: **GTR51**

PN (RN): **2065.000.11**

Set consists of GTR51 receiver (2065.100.11) and accessories. The GTR51 is a multisystem/multifrequency GNSS (Global Navigation Satellite System) receiver intended for time and frequency transfer. The 2065.100.11 receiver supports both code and phase measurements using signals of GPS, SBAS and GLONASS systems in several frequency channels. For more details on GTR51 receiver and other set components see relevant pages of this website.
